

# Prepared by Todd Beal

# FEMA Region 6 Weather Threat Briefing

Saturday, March 30, 2019

**Disclaimer:** The purpose of this briefing is to provide a <u>Regional</u> weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information.

To find your local NWS forecast office, go to <u>www.weather.gov/srh</u>.

## Summary of the Upcoming Week

## Today

 Isolated strong to severe thunderstorms are possible across extreme EAR and NE LA; damaging winds are the primary hazard.

## Sunday - Wednesday

No significant weather impacts expected.

## River Flooding

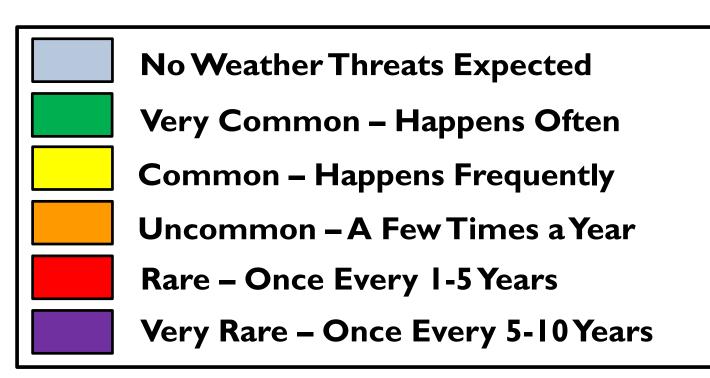

- Moderate to major flooding will continue into early April on the Mississippi River in EAR/E LA.
  - Impacts to shipping and industrial activities on the river, with numerous flooded roadways near the river.
  - All points have crested and many areas are forecast to drop into lower flood stages, but flooding will likely continue through April along the lower Mississippi River.
- A few rivers in portions of AR/LA will remain in minor flood stage with minimal impacts.

## FEMA Region 6 Threat Matrix

Mar 30, 2019 - Apr 3, 2019

DAY / THREAT	SAT	SUN	MON	TUE	WED
Severe Storms	Extreme E AR/NE LA				
Heavy Rain / Flash Flooding					
Winter Weather					
Fire Weather					
River Flooding	EAR/E LA	EAR/E LA	EAR/E LA	EAR/E LA	EAR/E LA

\*Threat levels are based on FEMA Region 6 criteria.

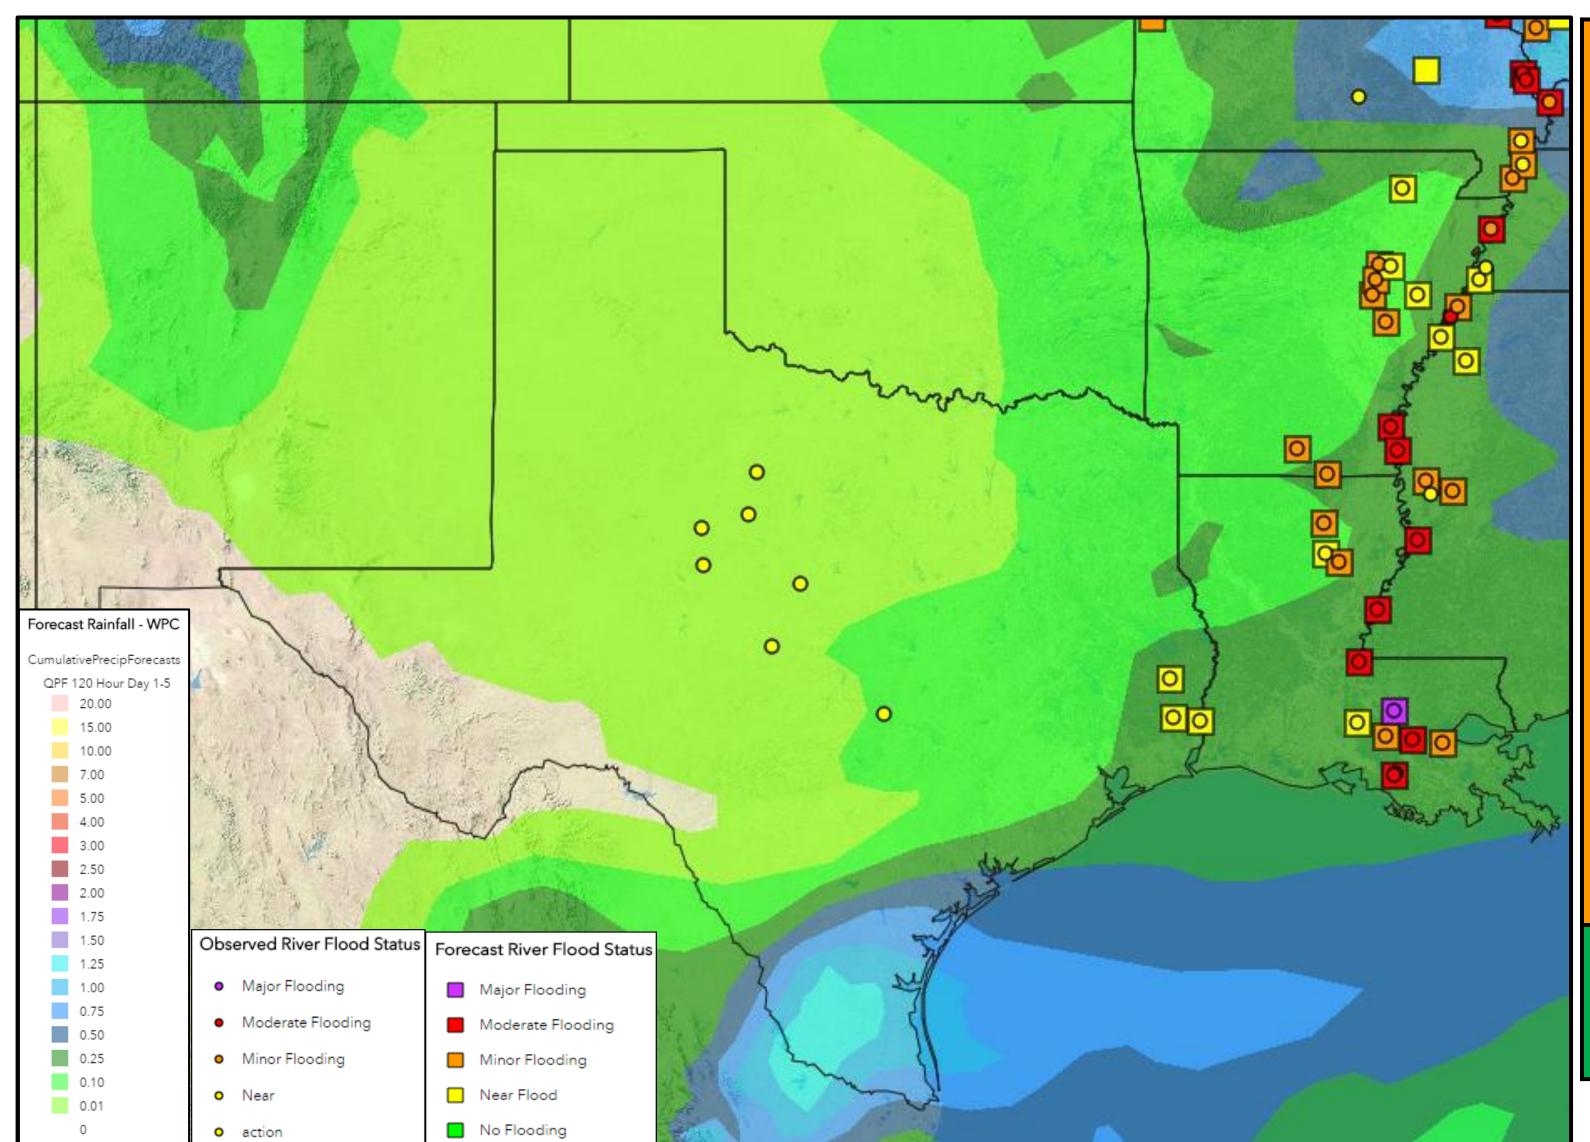

State or local threat level criteria may differ.\*

For more details on the colors in the threat matrix refer to the last slide in this briefing.

## 5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Moderate to Major flooding will continue into April on the Mississippi River in EAR/E LA. Keep in mind that current forecasts do not account for any additional rainfall or any flooding from the upstream portions of the Mississippi River.

#### **Arkansas**

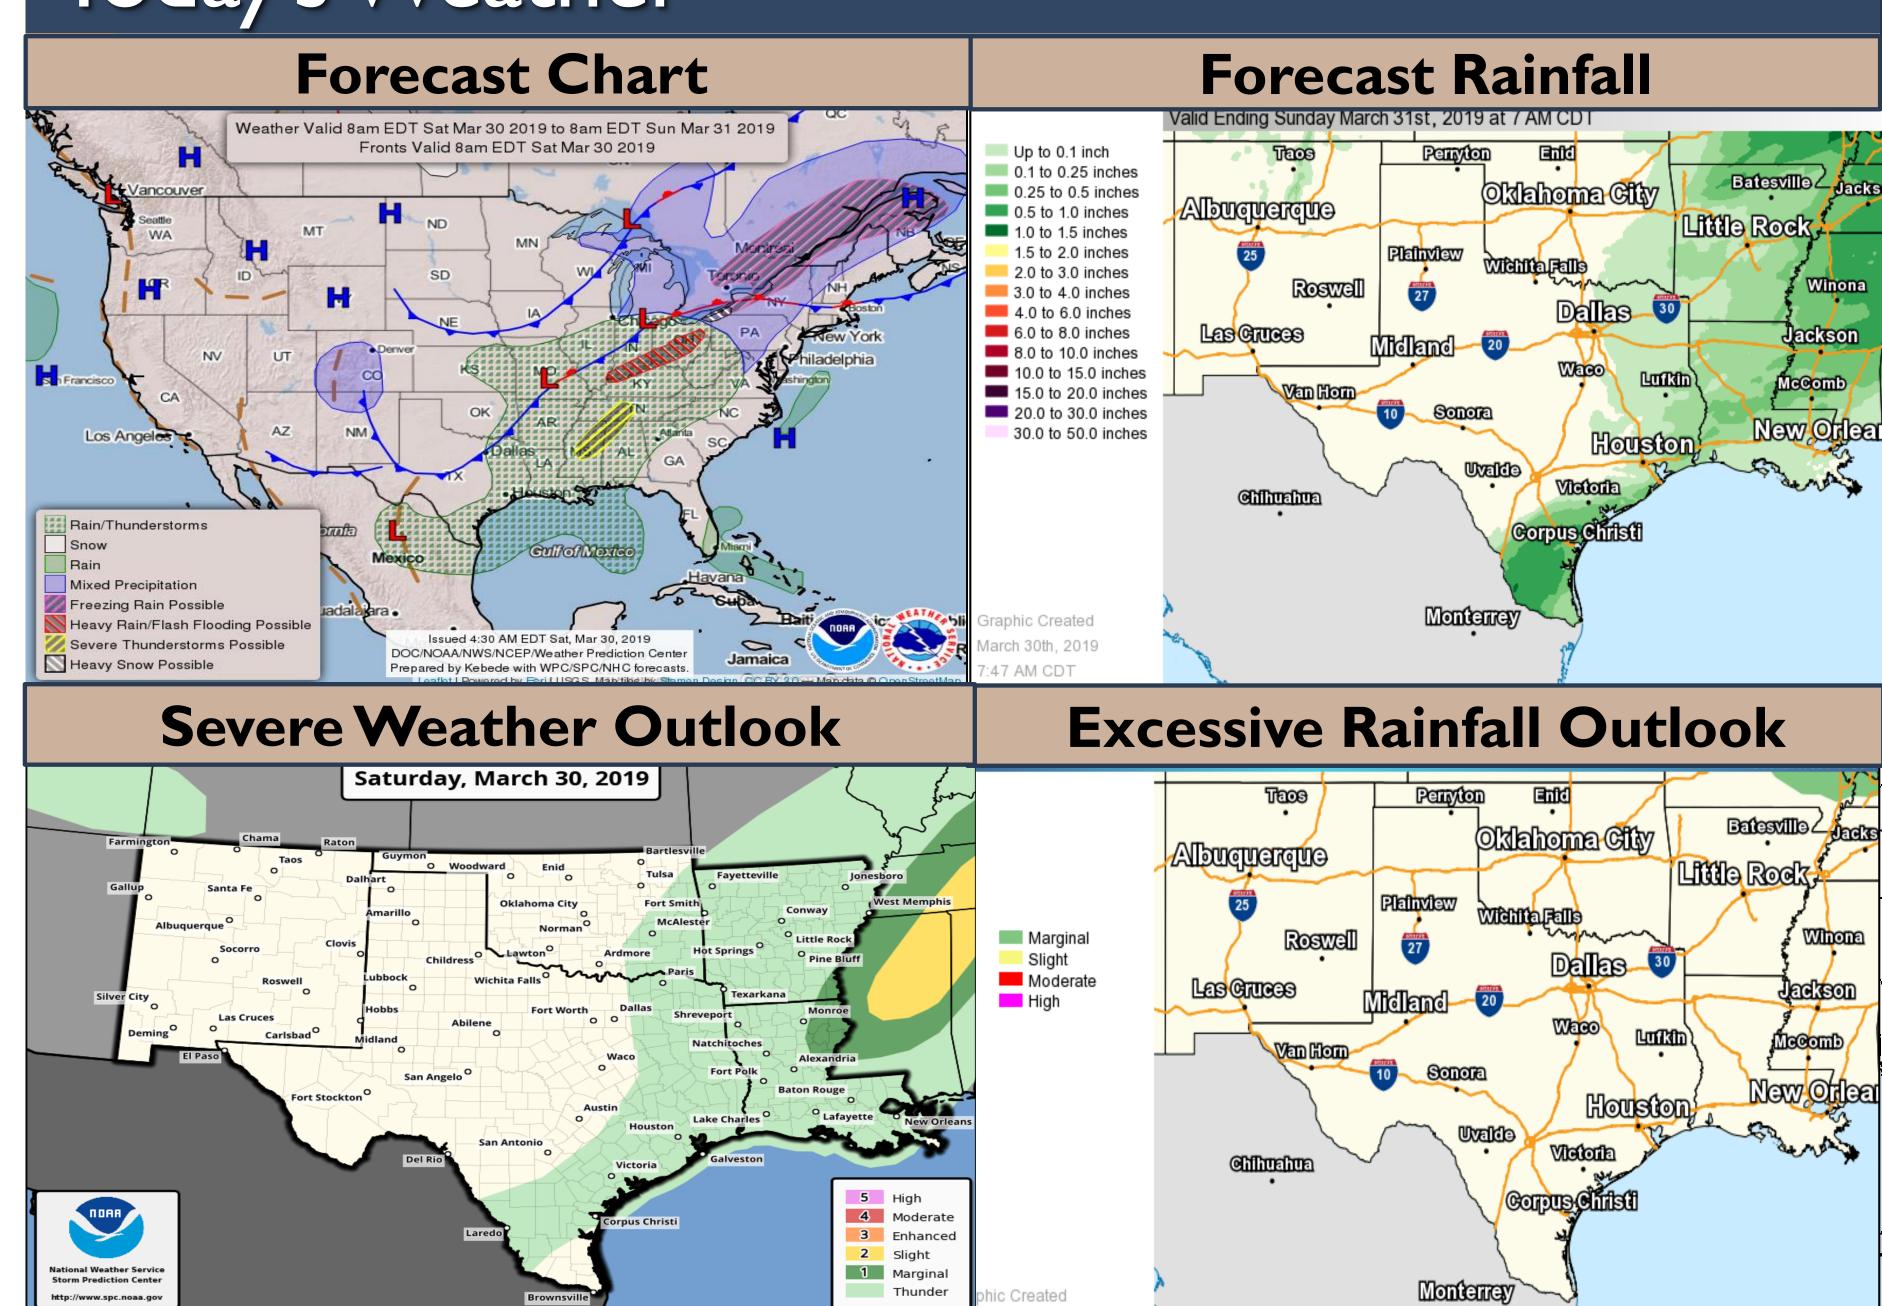

• MS River remains at moderate flood in many locations, with flooding of county roads/fields along the river and most land inside the levee protections.

#### Louisiana

- MS River at Baton Rouge is at Major flood.
   Shipping and industrial activities are significantly affected.
- Several other points remain at moderate flood.
- The Bonnet Carre Spillway is operating to reduce flow and maintain just under a 17.0ft stage at New Orleans. No significant impacts are noted.

The White River (AR) and the Ouachita/Atchafalaya Rivers (LA) are in minor to moderate flood stage with minimal impacts.

## Today's Weather

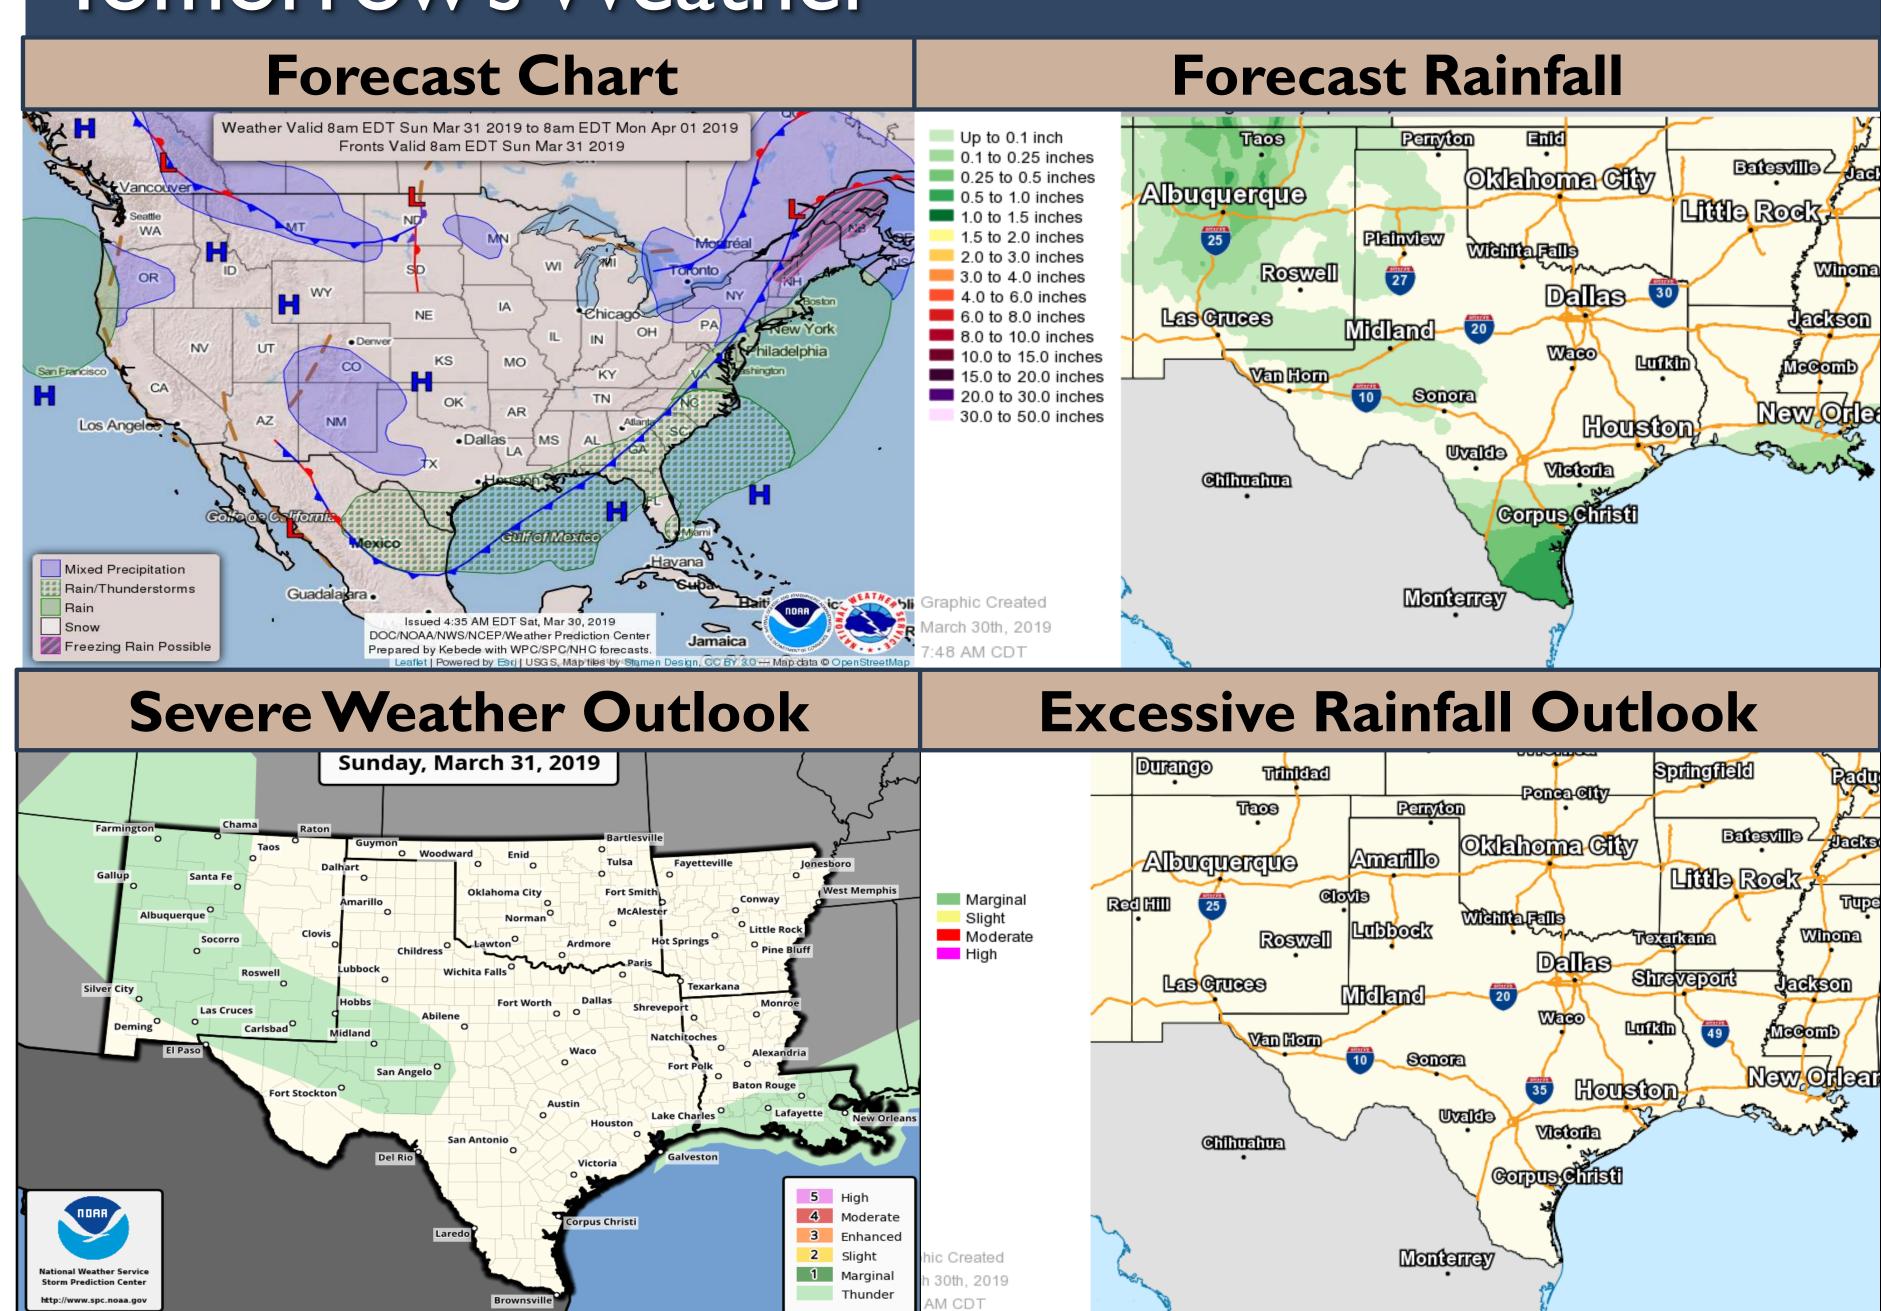

Thunder

hic Created

A few strong/severe thunderstorms possible across extreme EAR and NE LA. Damaging winds are the primary hazard

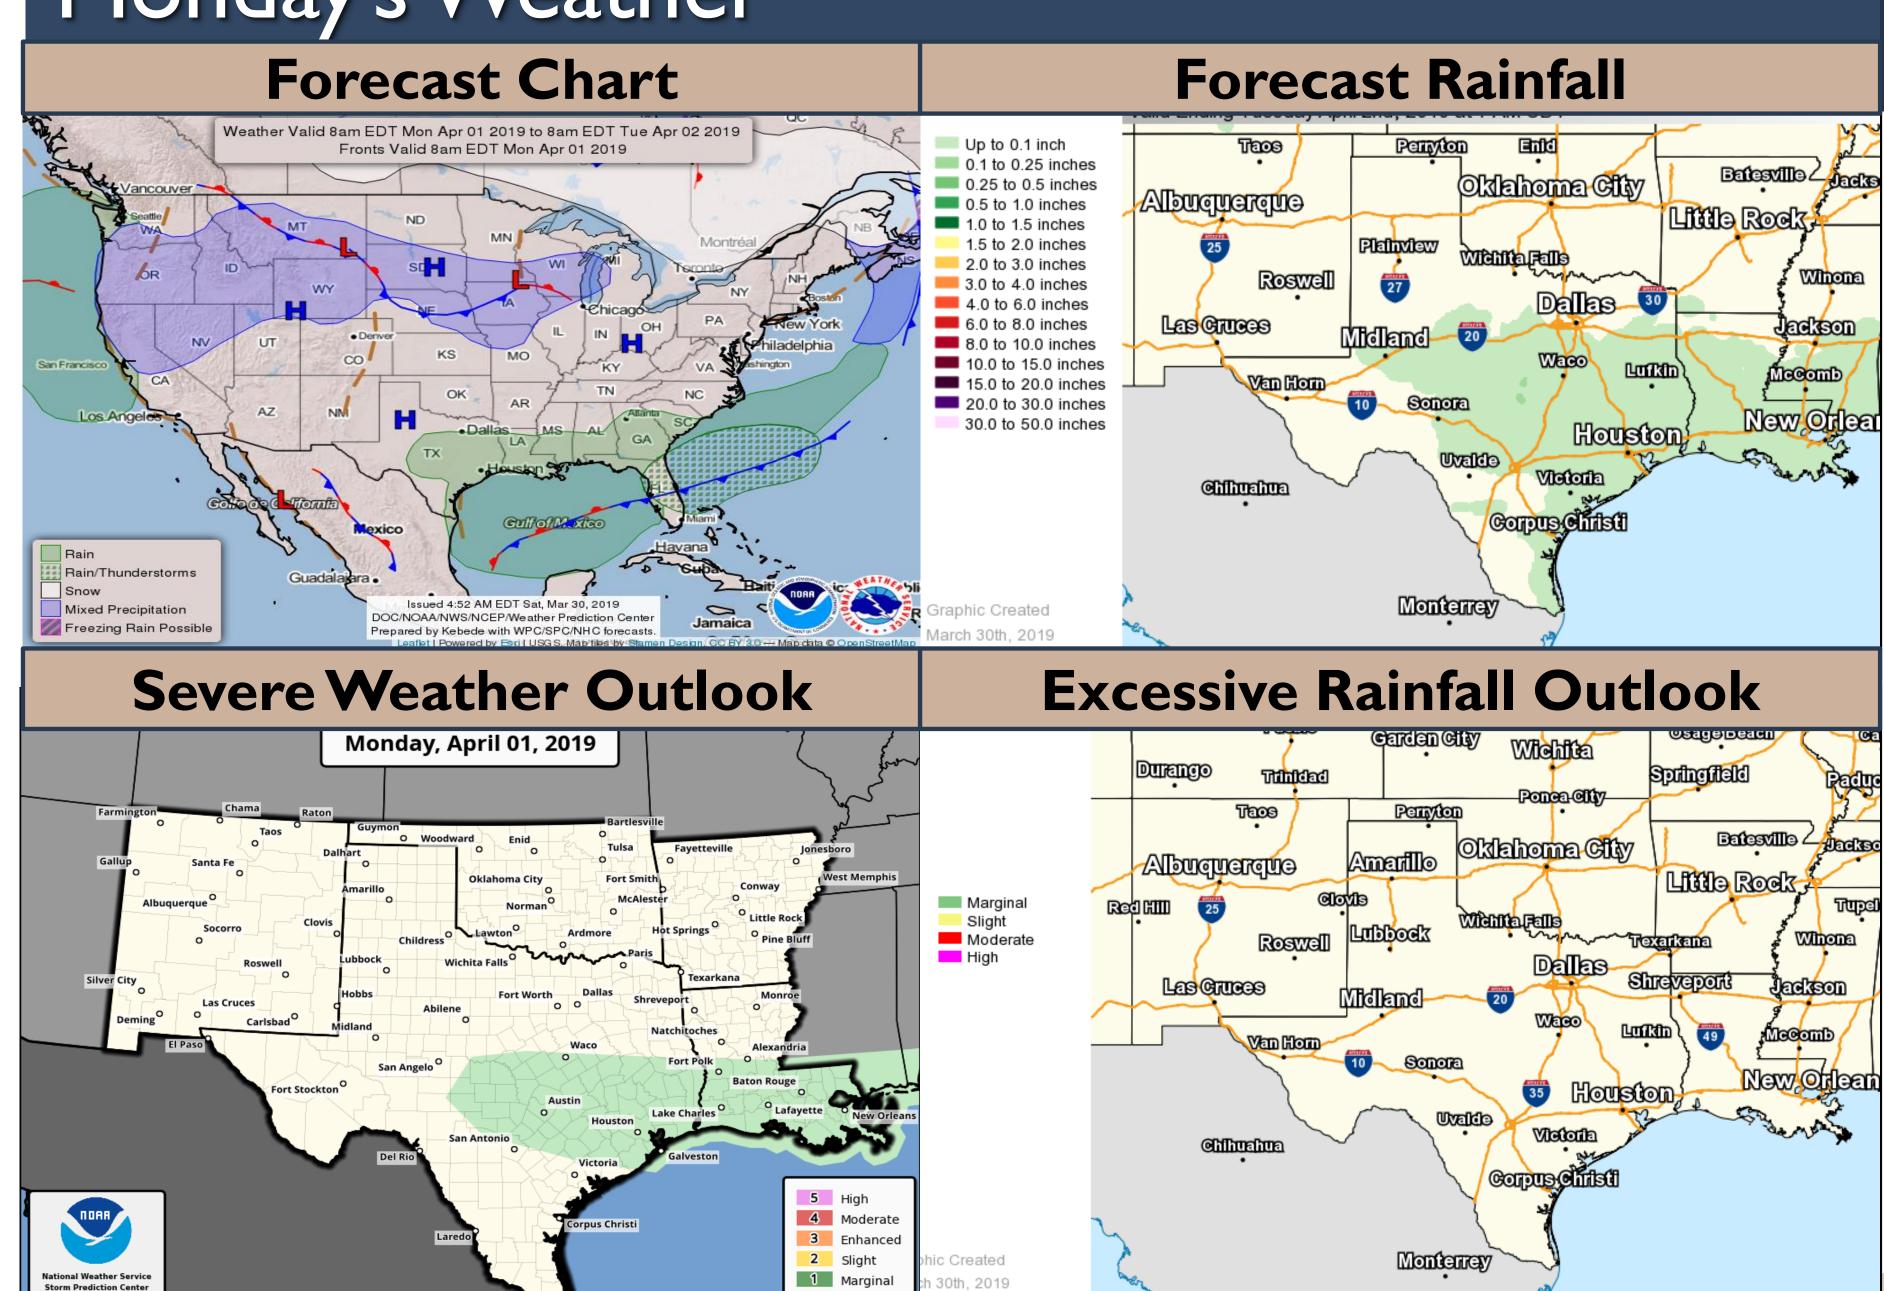

## Tomorrow's Weather

No significant weather impacts expected.

## Monday's Weather

Thunder

AM CDT

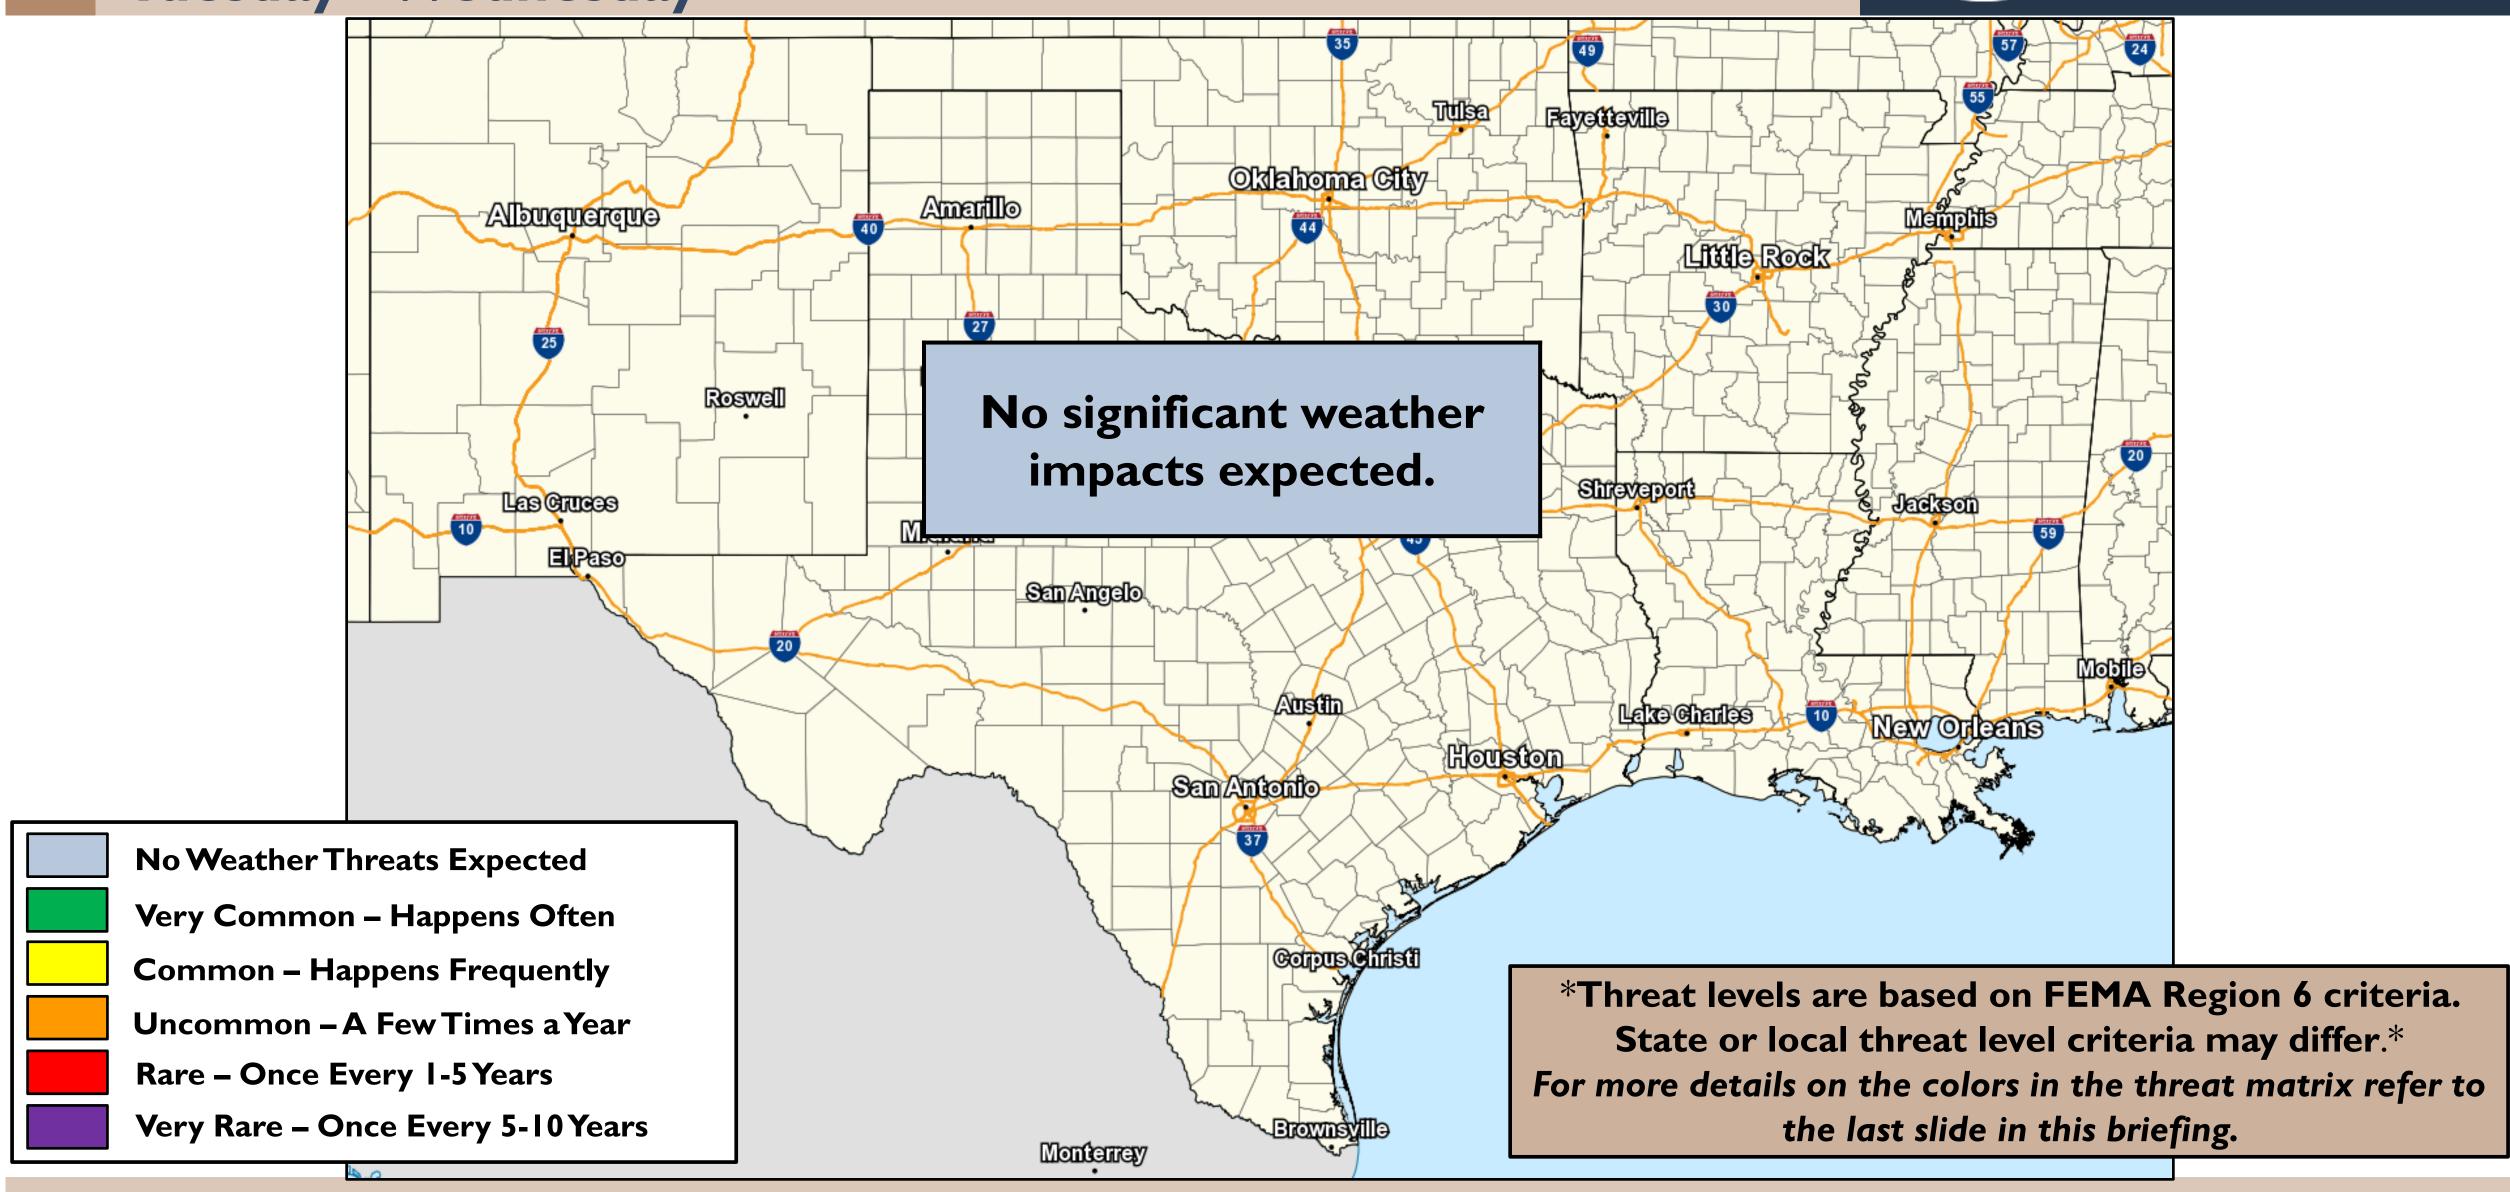

No significant weather impacts expected.

## Days 4-5 Weather Hazards

### Tuesday - Wednesday

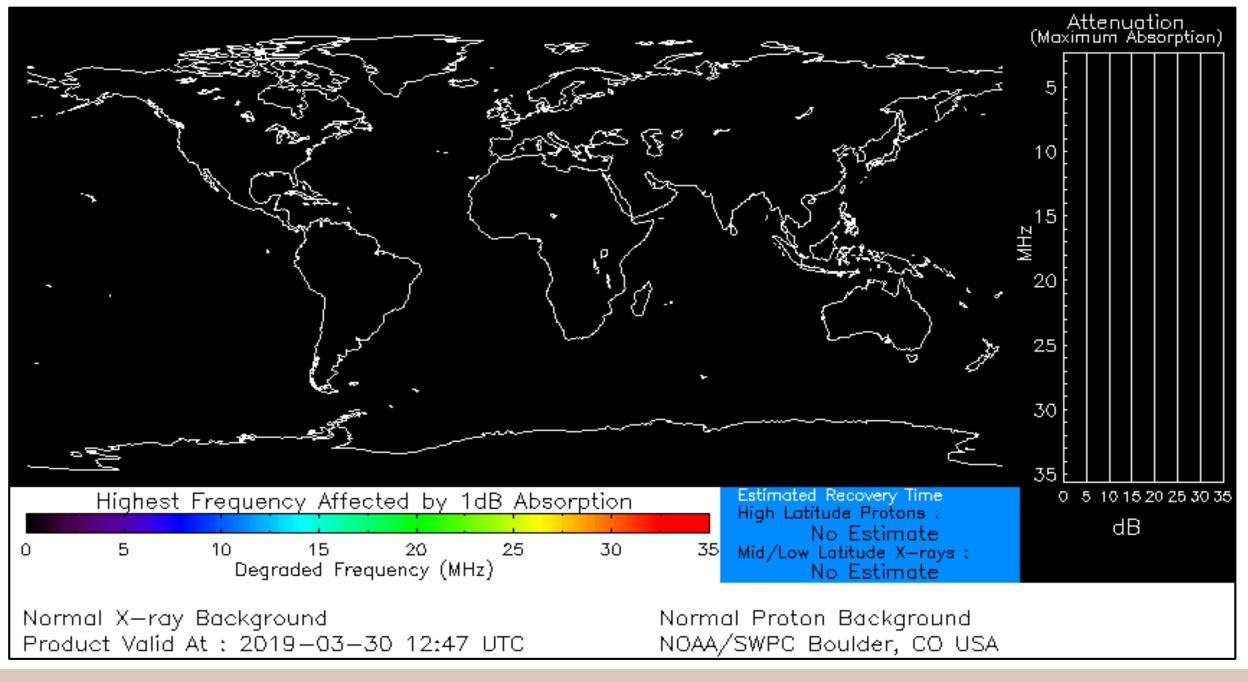

## Space Weather 3-Day Forecast

	Saturday	Sunday	Monday
Geomagnetic Storms	Quiet to Unsettled (Max Kp = 3)	Quiet to Unsettled (Max Kp = 3)	Quiet to Unsettled (Max Kp = 3)

	Weather "Threat" Matrix							
Color	Definition	Criteria	Example(s)					
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul> <li>Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees</li> <li>Something that happens almost every day in a particular season such as seabreeze storms in coastal TX</li> </ul>					
Yellow	Somewhat Common — Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul> <li>2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible</li> <li>Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail</li> </ul>					
Orange	Uncommon — A Few Times a Year  Safety: Often Threatening to Life and Property, Some  Damage Unavoidable  Impact Potential: Typically Results in Minor Disruption to  Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul> <li>A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely</li> <li>Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail</li> <li>Some large fires reported, burn bans advertised, critical conditions expected</li> </ul>					
Red	Rare — Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul> <li>A Category 1 hurricane will be moving towards the NW Gulf in the next few days</li> <li>Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail</li> <li>Large fires ongoing throughout the area with critical fire weather conditions expected to continue</li> </ul>					
Purple	Very Rare – Once Every 5-10 Years  Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed  Impact Potential: Typically Results in Long-Lived  Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul> <li>A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow</li> <li>Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms</li> </ul>					

Criteria for the color codes in this briefing is to the left, please provide any feedback to
